

Shade Decimals on Grid Squares

Shade the grid squares to show the decimal number.
Use the examples to help you.

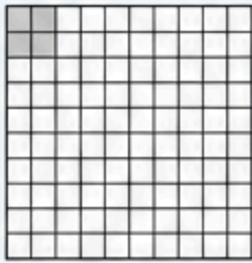

Remember:

- 1 tenth = 0.1 = 1/10
- 1 hundredth = 0.01 = 1/100
- 10 tenths = 1 whole
- 100 hundredths = 1 whole

Examples:

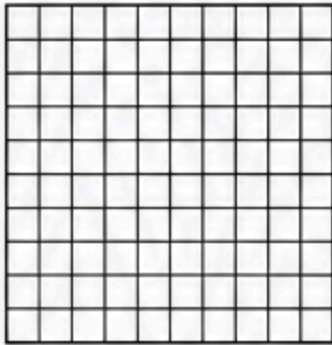

0.3
(3 tenths)

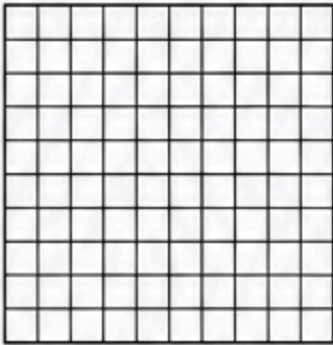

0.07
(7 hundredths)

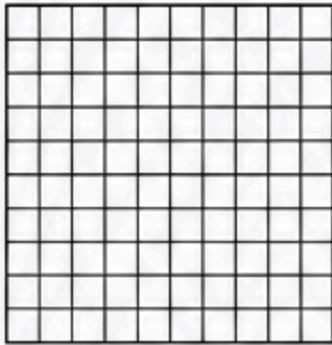

1. Shade 0.4 (four tenths).

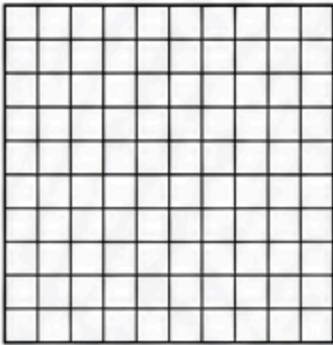

2. Shade 0.25 (twenty-five hundredths).

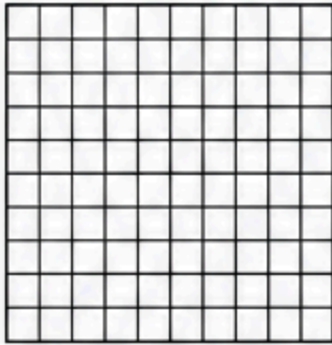

3. Shade 0.6 (six tenths).

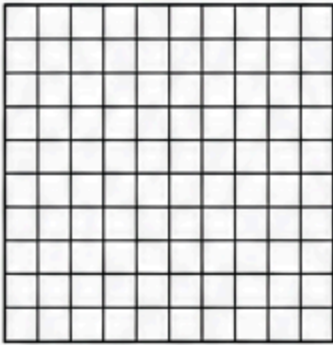

4. Shade 0.12 (twelve hundredths).

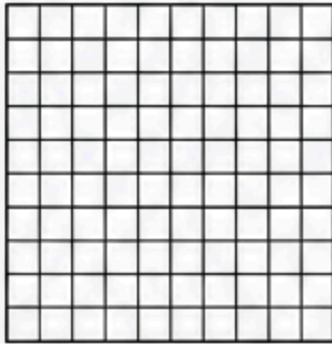

5. Shade 0.8 (eight tenths).

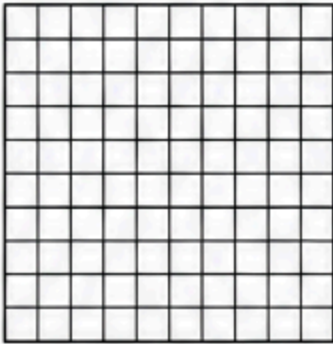

6. Shade 0.09 (nine hundredths).

7. Shade 0.33 (thirty-three hundredths).

8. Shade 0.5 (five tenths).

9. Which is easier to shade: 0.3 (tenths) or 0.25 (hundredths)? Why?
